

Burmeister & Partners was appointed to investigate the air-conditioning system at the CIH house and report on the existing system and the requirements to convert the current systems to be inline with the Montreal Protocol.

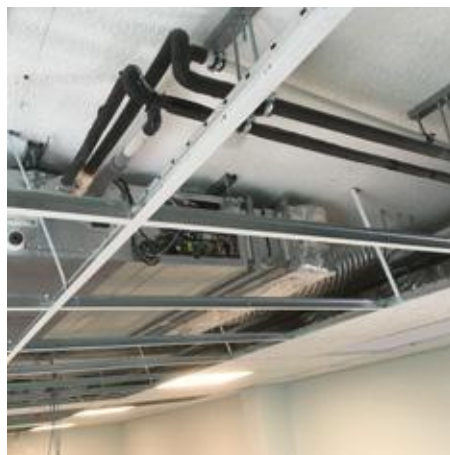

The existing systems were replaced with a variable refrigerant flow (VRF) system utilising environmentally friendly refrigerant.

CIH BUILDING

HVAC Refurbishment

PROJECT STATS

- Value** NAD 3.7 million
USD 0.2 million (ROE 16.24)
